Is the inverter a solar panel

What is a solar power inverter?
Solar Relays Overview Power inverters are an integral part of any solar energy system,converting DC power output coming from solar panels into AC current that can be fed into a commercial electrical grid or into an off-grid local electrical network.

Do solar panels need a power inverter?
They are available in a range of sizes and wattages for different situations. All panels come with mounting kits for standard roofs. You'll also need a power inverter. Solar panels generate DC current and your home uses AC current. The inverter converts DC into AC so it can be stored and transported efficiently and then be used by your appliances.

What are the different types of solar inverters?
There are two types of solar inverters,off-grid and grid-connected,and our main product is an off-grid inverter. What Types Of Hybrid Inverter We Offer?
