

Can I bring an outdoor power supply to Belgium

Do I need a power adapter in Belgium?

If your devices are compatible with these specifications, you will not need a power adapter. However, if your devices use a different plug type or are not compatible with the voltage in Belgium, you will need a power adapter and/or a voltage converter/transformer.

What type of power outlet does Belgium use?

Belgium's power outlets are type E. These are typical European sockets that appear pushed deeper into the wall than the standard American outlets. The outlet has space for two round 4.8-mm prongs that are 19mm apart, and it has a small rod coming out of the top of the outlet that fits into your adapter or Type E plug.

Can a universal power adapter fit a Belgium outlet?

Universal power adapters usually come with multiple plug types and can be adjusted to fit Belgium outlets and many others. If your devices are not compatible with the voltage in your destination country, a voltage converter or transformer will also be necessary to convert the voltage to the appropriate range for your devices.

Which power plugs are used in Brussels?

In Brussels power plugs and electrical outlets of types C & E are used: If you're not sure whether the outlets and plugs used in your country are the same as in Brussels, you can use the tool at the top of this page to check if you need a travel adapter.

What are the different types of power plugs in Belgium?

In Belgium, there are two main types of power plugs and outlets: Type C and Type E. Type C: Type C plugs have two round prongs on either side of the plug, commonly known as Euro plugs. Mostly used in Europe, South America, and Africa. Type C outlets can be fit with either Type E or Type F plugs.
