

What percentage of Cabo Verde's energy comes from imported petroleum products?

Includes a market overview and trade data. Imported petroleum products constitute about 80 percent of Cabo Verde's total energy supply, while less than 20 percent comes from renewable sources, primarily wind and solar.

Does Cabo Verde have electricity?

Imported petroleum products constitute about 80 percent of Cabo Verde's total energy supply, while less than 20 percent comes from renewable sources, primarily wind and solar. Although 93 percent of the population has access to electricity, there are significant losses in the distribution grids, and electricity costs are extremely high.

Why is the Cape Verde energy project important?

The project was a huge success and to this day remains one of the most important and influential strategic studies in the energy sector of Cape Verde.

Does Cabo Verde have a wind farm?

Wind: Cabo Verde has relevant experience in the sector, including through a public-private partnership called Cabeolica. Energy generated by wind turbines feeds the national grid on several islands. Cabo Verde offers good and reliable wind resources (18m/s).

Is Cabo Verde part of power Africa?

Cabo Verde has been included in a number of regional projects as described in the Power Africa Toolbox. Power Africa is a market-driven, U.S. government-led public-private partnership aiming to double access to electricity in sub-Saharan Africa.
