

Copenhagen Energy's 132 MWh Everspring battery energy storage system (BESS) portfolio will be supplied by Huawei Digital Power. Image: Huawei Digital Power. Copenhagen Energy's 132 MWh Everspring battery energy storage system (BESS) portfolio will source its technology from Huawei Digital Power.

Danish renewable energy developer Copenhagen Energy has selected Chinese technology company Huawei to deliver the battery systems needed for a 132-MWh portfolio of energy storage facilities at home. Dubbed Everspring, the battery energy storage system (BESS) portfolio targets energisation in the spring of 2026.

In July, Danish company Energinet was hired as the engineering, procurement, and construction (EPC) contractor for the projects. Danish renewable energy developer Copenhagen Energy has selected Chinese technology company Huawei to deliver the battery systems needed for a 132-MWh portfolio of energy storage facilities at home.

In related news, Huawei Digital Power, in collaboration with Schneider Electric, recently commissioned Cambodia's first T&V S&D-certified grid-forming energy storage project on June 11, 2025. This 12 MWh system includes a 2 MWh testbed that validated Huawei's grid-forming ESS technology.

Copenhagen Energy reached a final investment decision (FID) on the Everspring portfolio earlier in 2025. In June, it secured financing for the two sites under an agreement with regional bank Ringkjøbing Landbobank. In July, Danish company Energrid was hired as the engineering, procurement, and construction (EPC) contractor for the projects.

The system's design incorporates multi-layered safety features, and its battery packs, designated "Panshi," have undergone DNV-verified ignition tests. Huawei Digital Power is also recognized as a Tier 1 Power Inverter and Energy Storage Manufacturer by BNEF.
