

How does a subsea system work in Namibia?

This configuration, rarely seen in similar projects, underscores the technical complexities of operating in Namibia's frontier basin, where no prior infrastructure exists. The subsea system will comprise up to 40 production and injection wells tied back to the FPSO through a web of umbilicals, flowlines, and risers.

Is the Venus field a key player in Namibia's emerging oil sector?

TEEPNA currently holds two exploration licences for Blocks 2912 and 2913B. With its significant resource potential, the Venus Field is poised to become a key player in Namibia's emerging oil sector.

Why does Namibia have 18-line mooring system?

"The 18-line mooring system alone is a response to the unique metocean conditions here, ensuring stability over the asset's lifespan." The Venus discovery, announced in 2022, has positioned Namibia as a hotspot in global oil exploration.

Dec 13, 2023 · The first-ever grid-scale battery storage project in Namibia "signifies country's dedication to modernising energy infrastructure".

Namibia's just made a game-changing move. In December 2023, the country signed contracts for its first utility-scale battery energy storage system (BESS) - a 54MW/54MWh project at ...

May 7, 2024 · Namibia has secured funding worth over two billion Namibia Dollars for the expansion of its transmission network and integration of renewable energy into its grid. The ...

Namibia is expanding its own renewable energy production by hundreds of megawatts in photovoltaics and wind power. This rapid expansion poses ...

6 days ago · The Namibia Power Corporation (Proprietary) Limited (the "Borrower") will implement the Namibia Transmission Expansion and Energy Storage Project (the "Project"), as set out in ...

6 days ago · TotalEnergies EP Namibia B.V. (TEEPNA) and its joint venture partners--Impact Oil & Gas, NAMCOR, and QatarEnergy--plan to drill up to 40 subsea wells on the Venus Field ...

Sep 12, 2025 · TotalEnergies is happy with prices received from contractors vying to supply subsea hardware and a floating production, storage and offloading vessel for its Venus project ...

Namibia to up renewable energy, improve transmission network "Namibia is a uniquely positioned

regional leader in the transition towards [the] Transmission Expansion and Energy Storage ...

The Omburu energy storage project is the first independent large-scale grid-side battery energy storage project in Namibia, funded by utility and government grants.

WINDHOEK, Oct. 15 -- Namibia has received the first shipment of equipment for its 51-megawatt (MW) Omburu Battery Energy Storage System (BESS) project, the country's first utility-scale ...

Sep 12, 2017 · Executive Summary The overarching mission of Namibia's National Renewable Energy Policy is to enable access to modern, clean, environmentally sustainable, and ...

Apr 10, 2025 · In a major development for Namibia's growing oil and gas sector, TotalEnergies has revealed the massive scale of its Venus ultra-deepwater project, expected to generate ...

Dec 24, 2021 · Key contracts have been signed for the first-ever grid-scale battery storage project in Namibia, signifying the African country's dedication to modernising its energy infrastructure, ...

5 days ago · The Etango Uranium Project is located in the Erongo Region of Namibia, 30 kilometres south-east of Swakopmund.
