How much power does a 5kw inverter use?

Most 5kW inverters consume 50-70W of power when not in use. Victron and Schneider have the most efficient inverters, but this efficiency comes at a price. Some inverters have off switches with remote buttons or have software that detects a load and then switches on.

Is a 6 kW inverter worth it?

The combination of these two things means that it's probably not worth your while having a system at 6 kW. A 5 kW inverter will be the most cost effective. And the extra 1 kW of panels means that you'll get best use out of your inverter - it will spend more time running at its peak output.
